PRODUCT BACKLOG

Product backlog is a list of tasks for a specific project

Benefits of product backlog

1. Better organization
2. Improved collaboration
3. Smart iteration planning
4. Increased productivity
5. Less confusion and delays
6. No useless busywork

4 components of the product backlog:

1. Features
2. Bug fixes
3. Technical dept
4. Knowledge acquisition

Steps to create product backlog

1. Create a product roadmap
2. List all tasks
3. Prioritize all tasks
4. Update regularly
